Product Overview

Professional Wastewater Management

This submersible sewage pump is engineered for the reliable removal of wastewater and sewage in residential, commercial, and industrial settings. Built with high-durability materials, it features a robust motor and specialized impeller system designed to handle solids and debris effectively. Its reliable performance ensures consistent operation for demanding fluid management applications.

Technical Specifications

Key Design Elements

- Submersible design for compact installation
- High-durability construction materials
- Integrated robust motor
- Solid-handling impeller system

Suitable Applications

Residential, Commercial, Industrial

Performance

Key Operational Metrics

1 High

Solids Handling Capability

100 %

Reliability Rating
