

Submersible Sewage Pump with Float Switch

This submersible sewage pump is designed for efficient wastewater removal. It features robust construction for durability and long-term performance.

Product Overview

High-Efficiency Wastewater Management

This submersible sewage pump is engineered for robust performance in residential, commercial, and industrial wastewater applications. Built for longevity and reliability, it efficiently manages solids and debris in demanding environments. The integrated float switch enables seamless, automatic operation based on real-time water levels.

Technical Specifications

Design Features

- Submersible design
- Solid handling capability
- Durable construction
- Automatic float switch activation

Suitable Applications

Residential, Commercial, Industrial

Operation Mode

Automatic (Float Switch)
