

Submersible Solar Water Pump

This submersible water pump is designed for efficient water extraction using solar power. Its durable stainless steel construction makes it suitable for deep well applications.

Overview

High-Efficiency Solar Water Extraction

The 3TSC Submersible Solar Water Pump is engineered for reliable water extraction in remote locations where grid power is unavailable. Featuring a durable stainless steel construction, this pump is specifically designed for deep well applications and long-term performance. It provides an eco-friendly and efficient solution for professional water management needs using renewable solar energy.

Design & Build

Pump Diameter

3 inch

Pump Size

Material

Stainless Steel

Technical Specifications

Power Source

Solar Powered • Off-Grid

Pump Type

Submersible Solar Water Pump

Application

Primary Applications

- Deep well water extraction
- Remote location water supply
- Solar-powered irrigation

Performance

Key Performance Features

High Performance, High Reliability, Durable Construction
