

Submersible Solar Water Pump for Irrigation

Submersible solar pump designed for drainage and irrigation in agricultural applications. It features a stainless steel construction, suitable for narrow wells with a 3-inch diameter.

Overview

Efficient Solar-Powered Irrigation

This submersible solar pump is specifically engineered for agricultural drainage and irrigation applications. Constructed from durable stainless steel, it is designed to fit into narrow wells with a 3-inch diameter. It provides an eco-friendly and efficient solution for water pumping by leveraging solar energy.

Design & Construction

Material

Stainless Steel

Pump Type

Submersible Solar Pump

Technical Specifications

Well Diameter Compatibility

3 inch

Well Diameter

Power Source

Solar Power

Applications

Primary Applications

- Agricultural Irrigation
- Drainage
- Water Pumping
