

Submersible Stainless Steel Water Pump with Float Switch

High-quality submersible water pumps designed for efficient water removal in various applications. Constructed from durable stainless steel, these pumps are ideal for drainage, irrigation, and flood control.

Product Overview

Reliable Submersible Performance

This high-quality submersible water pump is engineered for efficient water removal across a variety of demanding applications. Constructed from durable stainless steel, it is built to withstand the rigors of drainage, irrigation, and flood control tasks. The integrated float switch ensures fully automatic operation based on water levels, providing reliable, hands-free performance in both clean and slightly dirty water environments.

Technical Specifications

Operation

Automatic • Float Switch Controlled

Available Models

SXM505, SXM400

Material

Stainless Steel

Applications

Recommended Uses

- Drainage
- Irrigation
- Flood Control

Water Compatibility

Clean and slightly dirty water

Design Features

Design Advantages

- Compact design for portability
- Easy installation in confined spaces
- Durable construction
