

Submersible Sump Pump with Automatic Float Switch

This submersible sump pump is designed for efficient water removal in residential and light commercial applications. It features durable stainless steel and thermoplastic construction for corrosion resistance and includes an automatic float switch.

Product Overview

High-Efficiency Submersible Sump Pump

This submersible sump pump is expertly engineered for efficient water removal in both residential and light commercial environments. Built with a robust combination of stainless steel and thermoplastic, the unit ensures long-lasting durability and superior corrosion resistance. Integrated with a reliable automatic float switch, it provides autonomous operation for basement drainage and flood prevention, delivering high pumping capacity with quiet performance.

Technical Specifications

Primary Features

- Automatic float switch operation
- Corrosion-resistant exterior
- Multi-size discharge adapter
- Quiet-running motor

Construction Materials

Stainless Steel, Thermoplastic

Application

Typical Applications

Basement Drainage • Sump Pit Draining • Water Accumulation Removal
