

Submersible Sump Pump with Float Switch

This submersible sump pump is designed for efficient water removal in residential and light commercial applications. With a stainless steel motor housing and thermoplastic base, it delivers reliable performance and corrosion resistance.

Product Overview

Reliable Water Management

The Q1DS-G is a high-performance submersible sump pump designed for efficient water removal in both residential and light commercial environments. It features an integrated float switch for fully automatic operation, ensuring seamless protection against flooding in basements and crawl spaces. Built with a durable stainless steel housing and a robust thermoplastic base, this pump is engineered for long-term corrosion resistance and reliability.

Performance Metrics

Key Features	Submersible, Automatic Float Switch, Corrosion Resistant, Residential & Light Commercial
--------------	--

Construction & Materials

Motor Housing Material	Stainless Steel
Base Material	Thermoplastic

Operational Details

Operation Mode	Automatic
Switching Mechanism	Integrated Float Switch

Installation

Common Applications

- Basements
- Crawl spaces
- Light commercial facilities
- General flood prevention
