

Submersible Sump Pump with Float Switch

The submersible sump pump is designed for efficient water removal in various applications. It features a durable construction with a robust motor for reliable performance.

Product Overview

Professional Submersible Sump Pump

This high-performance submersible sump pump is engineered for efficient water management in both residential and light commercial environments. Featuring a robust motor and integrated float switch, it provides reliable, automated water removal by activating only when needed. Its compact, portable design allows for seamless installation in restricted spaces, making it an ideal solution for draining basements, pools, and flood-prone areas.

Technical Specifications

Operation

Automatic • Submersible • Float Switch Controlled

Recommended Applications

- Basement drainage
- Pool maintenance
- Flood water removal
- Compact space water management

Design Features

Key Build Features

Durable Construction, Compact Design, Integrated Handle, Robust Motor
