

Submersible Water Drainage Pump with Float Switch

This submersible drainage pump is designed for efficient water removal in various applications. Its compact design allows for easy portability and storage.

Product Overview

High-Efficiency Submersible Drainage

This submersible water drainage pump is engineered for reliable performance in domestic and light-duty applications such as cellars, pools, and construction sites. It features a fiberglass-reinforced technopolymer body that offers exceptional resistance to corrosion, mechanical stress, and impact. Equipped with an automatic float switch and an integrated thermal cutout relay, this pump ensures safe, continuous operation and long-lasting durability.

Technical Specifications

Protection Rating

IP 68

Insulation Class

F

Standard Cable Length

5 m

Compliance Standards

EN 60 335-1, IEC 335-1, CEI 61-150, EN 60034-1, IEC34-1, CEI 2-3

Materials and Design

Material Composition

- Fiberglass reinforced technopolymer delivery body
- Fiberglass reinforced technopolymer suction strainer
- Noryl GFN2V technopolymer open impeller
- Stainless steel motor shaft

Sealing System

Double mechanical seal (carbon/alumina) with barrier oil chamber
