Product Overview

Submersible Water Pump Series

This heavy-duty submersible pump series is engineered for high-performance water removal in demanding environments. Designed for efficiency, these pumps are suitable for drainage, sewage management, and general water transfer applications. With a robust build, each model is designed for long service life and exceptional reliability under challenging conditions.

Performance Data

Model Specifications

Model	Power (kW)	Power (HP)	Outlet	Max Flow (m³/h)	Max Head (m)	Weight (kg)
WQD10-8-0.55	0.55	0.73	2"	14.5	12	19
WQD10-11-0.75	0.75	1	2"	16.5	14	20
WQD8-16-1.1	1.1	1.5	2"	21	17.5	23
WQ15-15-1.5	1.5	2	2"/2.5"	22.5	23	25

Technical Specifications

Operational Speed

2900 r/min

Rotation Speed

Power System

Single-phase
