

Submersible Water Pump for Aquariums and Fountains

This submersible water pump is designed for aquariums, seafood pools, and indoor/outdoor fountains. It features a stainless steel shaft and resin-coated motor for waterproof performance.

Product Overview

Versatile Submersible Pump System

The FP series submersible water pump is a multifunctional solution designed for diverse applications, including aquariums, seafood pools, and both indoor and outdoor fountains. Featuring a durable stainless steel shaft and a resin-coated motor, this pump offers excellent waterproof and isolation performance in both freshwater and seawater environments. The unit integrates pumping, filtering, and fountain capabilities, with easy-to-assemble pipes that allow for adjustable fountain shapes and heights.

Key Features

Stainless Steel Shaft, Resin-Coated Motor, 3-in-1 Multifunctional, Freshwater Compatible, Seawater Compatible

Technical Specifications

Model Comparison

Model	Power (W)	Flow (L/h)	Lift (m)	Weight (kg)
FP1001	15	700	0.8	0.42
FP1002	20	750	1.2	0.69
FP1005	40	1750	1.3	1.08
FP1006	50	2100	1.8	1.08
FP1008	100	3000	3	2.29
FP1100	140	3600	3	2.52

Electrical Requirements

- Voltage: AC220/110V
- Frequency: 50/60Hz
