

Submersible Water Pump for Deep Wells

This submersible pump is designed for various water extraction applications. It is constructed with durable materials for longevity and resistance to corrosion.

Overview

Submersible Deep Well Solution

The 100QJH6 submersible pump is a high-performance water extraction solution engineered for deep wells. Designed with premium, corrosion-resistant materials, it ensures longevity and reliable performance in demanding environments. This versatile unit provides efficient water transfer suitable for a wide range of industrial and agricultural applications.

Technical Specifications

Model Number	100QJH6
Primary Applications	Deep Well, Water Transfer, General Extraction

Build Quality

Construction Features

- Durable construction
- Corrosion-resistant components
- Engineered for high-efficiency operation
