

Submersible Water Pump for Irrigation

This submersible water pump is designed for drainage and irrigation. It features robust construction for reliable performance in demanding environments and is suitable for agricultural use.

Product Overview

High-Efficiency Submersible Irrigation Pump

This submersible water pump is engineered for robust performance in drainage and agricultural irrigation applications. Built to withstand demanding environments, it ensures reliable water transfer and efficient management for farming operations. The unit features comprehensive safety warnings and clear operational ratings to support professional field use.

Technical Specifications

Performance

750 W

Power

130 L/min

Flow Rate

10 m

Max Head

2860 r/min

Rotational Speed

Electrical Requirements

Parameter	Value
Voltage	220V
Frequency	50Hz

Safety & Compliance

Operating Warnings

- Do not operate without water
- Read manual thoroughly before use

Safety and Protection

IPX8 Protection, Insulation Class E
