

Submersible Water Pump for Irrigation

This submersible pump is designed for efficient drainage and irrigation. Constructed with durable materials, this pump is suitable for demanding agricultural applications.

Product Overview

High-Efficiency Submersible Irrigation Pump

This submersible water pump is engineered for reliable performance in demanding agricultural and industrial environments. It excels at water lifting from wells, farm irrigation, and effective drainage for construction or breeding sites. With a robust design, it ensures consistent operation even in challenging water conditions.

Performance Metrics

Key Performance Indicators

5 m

Max Operating Depth

40 °C

Max Fluid Temperature

40 °C

Max Ambient Temperature

Technical Specifications

Insulation Class

Class E

Protection Class

IPX8

PH Range

6.5-8.5

Applications

Primary Applications

- Countryside well water lifting
- Farmland irrigation and drainage
- Industrial ponding drainage
- Construction site water removal
- Agricultural breeding systems
