

# Submersible Water Removal Pump

This compact submersible pump is designed for efficient water removal. It features a durable construction and automatic float switch, making it ideal for draining basements, pools, and flooded areas.

## Product Overview

### Submersible Water Removal Pump

This range of professional-grade submersible pumps is engineered for high-performance water removal in residential and commercial settings. Equipped with automatic float switches for intelligent water level management, these units ensure reliable drainage for basements, flooded areas, and pools. The robust construction and diverse power configurations offer versatile solutions for handling both clean and slightly dirty water.

## Technical Performance

### Model Specifications

Model	Max Flow (m³/h)	Max Head (m)	Power (kW)	Outlet (mm)
V180AF	5	5	0.18	25
V250AF	9	7.5	0.25	25
V450AF	6	8	0.45	50
V750AF	18	12	0.75	50
V1100AF	10	12	1.1	50
V1100DF	15	10	1.1	50
V1300DF	18	12	1.3	50
V1500AF	18	12	1.5	50
V2200AF	6	45	2.2	80

## Electrical Standards

### Standard Electrical Configuration

**220 V**

Voltage

**50 Hz**

Frequency
