

Subwoofer Enclosure with Bass Port

Acoustic enclosure designed for housing a subwoofer driver. It features a triangular port to enhance bass response and is constructed from a rigid material covered in gray carpet.

Product Overview

Acoustic Subwoofer Enclosure

This high-performance subwoofer enclosure is engineered to house a single driver unit for optimal low-frequency sound reproduction. Constructed from a rigid, durable material such as wood or MDF, the cabinet is finished in a professional gray carpet-like covering for aesthetic appeal and acoustic damping. Featuring a specialized triangular bass port, this enclosure is designed to enhance bass response and deliver a deep, powerful sound experience when connected to an external amplifier.
