

Suction Valve Assembly

This complete suction valve assembly is designed for use in hydraulic or pneumatic systems. It is constructed from machined metal components with ports for fluid or gas passage and control.

Product Overview

Precision Engineered Suction Valve

This suction valve assembly is a high-durability component designed for demanding maritime and industrial applications. Featuring a robust, multi-stage cylindrical metal construction, it ensures secure sealing via precision O-rings and integrated porting. It is engineered for seamless integration into hydraulic or pneumatic systems, offering reliability in heavy-duty operational environments.

Compatibility

2-Stroke Engine Compatibility

S26MC, L35MC, S35MC, L42MC, S42MC, S46MC-C, L50MC, S50MC/-C, L60MC, S60MC/-C, L70MC, S70MC, L80MC, S80MC, K80MC/-C

4-Stroke Engine Compatibility

L16/24, L20/27, L23/30, L23/30A, L28/32, L28/32A, L28/32H

Technical Details

Design Specifications

- Multi-stage cylindrical body
- Machined metal construction
- O-ring sealing system
- Threaded mounting interface
