

Sugar Refinery Plant with 8000 Tons Daily Capacity

This project constructs a modern sugar refinery designed to process 8000 tons of cane sugar per day. It includes both design and equipment supply.

Project Overview

Modern Sugar Refinery Solution

This modern sugar refinery plant is engineered for high-efficiency cane sugar processing with a daily capacity of 8000 tons. The project scope encompasses full-scale design and comprehensive equipment supply to ensure operational excellence. This industrial solution is built to meet large-scale production demands with robust, reliable infrastructure.

Technical Specifications

Daily Processing Capacity	8000 Tons
