Product Overview

Professional Sugarcane Juice Extractor

This high-performance, single-pass juice extractor is designed for maximum juice yield through a precision-engineered roller gap. Constructed from heavy-duty stainless steel, the unit ensures long-lasting hygiene and ease of maintenance in demanding commercial environments. It features an integrated gearbox that delivers superior torque, reducing motor strain and extending the machine's operational lifespan.

Technical Specifications

Operational Design

- Single-pass extraction mechanism
- High-yield roll gap adjustment
- Gearbox-driven high torque system
- Continuous operation capability

Material

Heavy-duty stainless steel

Cleaning & Maintenance

Removable drum, Removable juicing chamber, Easy clean design

Accessories & Options

Optional Equipment

Stainless steel cart • Wheeled base

Application

Ideal Environments

- Juice bars
- Restaurants
- Food processing facilities
