

Sugarcane Peeling Loader

The sugarcane peeling loader is a specialized machine designed for efficient sugarcane processing. It features a robust hydraulic system for lifting and maneuvering sugarcane stalks and a peeling mechanism that removes the outer layers.

Overview

Efficiency in Sugarcane Processing

The Sugarcane Peeling Loader is a specialized machine engineered for high-efficiency sugarcane handling and preparation. Featuring a robust hydraulic system for lifting and a precision peeling mechanism, it streamlines the workflow by removing outer layers before final processing. With its powerful engine and rugged durability, this unit is built to provide reliable, consistent performance in demanding agricultural environments.

Technical Specifications

Model Number	ZLGC16
Key Systems	Hydraulic Lifting, Automated Peeling, Powerful Engine

Operation

Operational Highlights

- Ergonomic cabin design for operator comfort
- Intuitive control interface for enhanced productivity
- Durable tires suitable for field environments
