

# Sugarcane Planting Machine

The sugarcane planting machine automates furrow opening, seed cane placement, fertilizer application, and soil covering. Featuring multiple planting units with rotating dispensers and adjustable furrow openers, it ensures consistent performance across varying field conditions.

## Product Overview

### Professional Sugarcane Planter 2CZ-2A

The 2CZ-2A sugarcane planter is a specialized agricultural machine engineered for efficient, precise planting in medium to large-scale operations. It automates critical steps including furrow opening, fertilizer application, seed cane placement, and soil covering to ensure optimal growth conditions. Featuring robust construction and hydraulic controls, this implement delivers consistent performance across varying field environments.

## Technical Specifications

### Core Equipment

- Multiple planting units
- Rotating seed cane dispensers
- Adjustable furrow openers
- Hydraulic control system

Machine Type	Sugarcane Planting Machine
--------------	----------------------------

Model Number	2CZ-2A
--------------	--------

## Compatibility & Features

### Automated Operations

- Furrow opening
- Seed cane placement
- Fertilizer application
- Soil covering

Connection Type	Three-point hitch
-----------------	-------------------

Ideal Farm Size	Medium-scale, Large-scale
-----------------	---------------------------
