

Sump Pump for Water Removal

This sump pump is designed for efficient and reliable water removal in residential and light commercial applications. Its robust motor handles solids and debris, while the automatic float switch ensures convenient operation.

Overview

Professional Water Removal Solution

The Q1DP-S sump pump is designed for efficient and reliable water removal in both residential and light commercial applications. Engineered with a robust motor and capable of handling solids and debris, this pump ensures consistent, long-lasting performance in demanding environments. Its integrated automatic float switch provides hands-free operation, activating automatically when water levels rise to effectively prevent flooding in basements and crawl spaces.

Technical Specifications

Handling Capabilities

- Handles solid waste
- Processes debris
- Automatic flood prevention

Operation

Automatic with float switch

Suitable Environments

Residential, Light Commercial, Basements, Crawl Spaces

Construction

Build Quality

Corrosion-Resistant • Durable Construction
