

Super Duty Digital Control Floor-Mounted Boring-Milling Machine

This super duty digital control floor-mounted boring-milling machine is designed for heavy-duty machining applications requiring high precision and rigidity. Its floor-mounted design provides stability and enables the machining of large and heavy parts.

Product Overview

Super Duty Floor-Mounted Precision

This floor-mounted boring-milling machine is engineered for heavy-duty industrial machining where high precision and extreme rigidity are non-negotiable. Designed to handle oversized workpieces, the unit utilizes an advanced digital control system to ensure accuracy across a large work envelope. Its robust architecture and powerful spindle drive provide the stability required for demanding metalworking tasks.
