

Super Thin Abrasive Cutting Wheel

This super thin abrasive cutting wheel is designed for precision cutting applications. It features a durable abrasive grain and reinforced resin bond, ideal for cutting metal, stainless steel, and other materials with minimal burr formation.

Product Overview

Precision Abrasive Cutting Solutions

This super thin abrasive cutting wheel is engineered for high-performance precision cutting tasks. Featuring a reinforced resin bond, it ensures an extended operational lifespan and superior resistance to breakage. Its ultra-thin profile is specifically optimized for fast, clean cuts with minimal material waste and reduced burr formation, making it ideal for metal and stainless steel applications.

Technical Specifications

| | |
|--------------------------|---------|
| Maximum Peripheral Speed | 70 m/s |
| Abrasive Grade | A60Q4BF |

Performance Data

Size and RPM Ratings

| Diameter (mm) | Max RPM |
|---------------|---------|
| 125 | 11000 |
| 150 | 9100 |
| 160 | 7600 |
| 200 | 6800 |
| 250 | 5500 |

Application Details

Compatible Equipment

- Angle grinders
- Cut-off saws
