

Super Thin Mesh Turbo Rim Tile Blade

This 9-inch blade is designed for cutting porcelain, ceramic tile, and marble. It features an ultra-thin turbo mesh rim for clean and efficient cuts at a maximum speed of 6,800 RPM.

Product Overview

Professional Performance Blade

This super thin mesh turbo rim tile blade is engineered for high-precision cutting in demanding professional applications. Its ultra-thin design minimizes material waste while ensuring fast, chip-free action on hard surfaces. The integrated stiffening flange provides the structural rigidity necessary for straight, clean cuts every time.

Technical Specifications

Maximum Speed

6800 RPM
Max Speed

Blade Diameter	230 mm
Diameter (Inches)	9 in
Cutting Edge Thickness	1.4 - 2.0 mm

Usage & Compatibility

Cutting Method

Dry • Wet

Usage Restrictions

- Not recommended for metals

Compatible Materials	Porcelain, Marble, Ceramic, Glass, Granite
