

Surface Cleaning Squeegee with Metal Blade

This squeegee is designed for cleaning smooth surfaces. It features a metal blade held by a black plastic frame and handle.

Product Overview

Professional Surface Cleaning Squeegee

The JM-3121B surface cleaning squeegee is engineered for effective water and residue removal on smooth surfaces. It features a durable metal blade securely mounted within a robust black plastic frame and handle assembly. Designed for reliability, the blade is attached to the handle with a screw mechanism, ensuring stability during intensive cleaning tasks.
