

Surface-Mount Boundary Microphone

This surface-mounted microphone is designed for capturing audio on flat surfaces. It features a wide frequency response suitable for conference rooms and boardrooms, ensuring clear and unobtrusive recording.

Overview

Professional Surface-Mount Audio Capture

The HT-710 is a high-performance boundary microphone engineered for professional audio capture in conference rooms, boardrooms, and meeting spaces. Its low-profile design ensures an unobtrusive presence on surfaces while delivering wide frequency response for clear, intelligible sound. Built with durable materials, it effectively minimizes unwanted noise and vibrations to ensure reliable performance in critical communication environments.

Technical Specifications

Model Number	HT-710
Mounting Type	Surface-mount
Key Features	Low-profile, Noise reduction, Vibration dampening, Durable construction

Applications

Recommended Environments

- Conference rooms
- Boardrooms
- Meeting spaces
