

Surface Mount LED Light

This high-power surface mount LED is suitable for various illumination applications. Its robust design ensures efficient heat dissipation and a long lifespan.

Product Overview

High-Power Surface Mount LED

This high-power surface mount LED is engineered for versatile illumination applications, ranging from custom lighting projects to automotive and industrial use. Designed with robustness in mind, it features efficient heat dissipation capabilities to ensure a long operational lifespan. Its high luminous efficacy and wide viewing angle provide consistent, reliable performance for professional lighting requirements.

Technical Specifications

Mounting Type	Surface Mount
Heat Sink Required	Yes

Performance Features

Key Features

High Luminous Efficacy • Wide Viewing Angle • Robust Design

Intended Applications	Custom Lighting, Automotive, Industrial
-----------------------	---
