Product Overview

Professional Surface Preparation

This surface scraper tool is engineered for precision and durability in professional finishing tasks. Featuring high-quality stainless steel blades, it offers excellent corrosion resistance and reliability for demanding applications. Its ergonomic design ensures user comfort during extended use, making it an ideal choice for surface preparation, material spreading, and smoothing.

Technical Specifications

Blade Material	Stainless Steel
Handle Material	Plastic
Key Features	Ergonomic Grip, Corrosion Resistant, Hanging Hole, Flexible Blade

Applications

Recommended Uses

- Removing paint
- Applying spackle
- Smoothing surfaces
- Spreading materials
- Applying finishes
