

Surge Protected Power Strip with Individual Switches

This power strip offers multiple power connections from a single wall outlet. It is equipped with individual switches for each Australian standard outlet and includes surge protection.

Product Overview

Reliable Surge Protection for Professionals

This surge-protected power strip is designed to provide safe and efficient power distribution for office and home environments. Featuring individual switches for each outlet, it allows for precise control over connected devices, helping to save energy and protect equipment. Built with high-quality components, it offers a robust solution for managing multiple power connections from a single wall outlet.
