

Surveillance System with IP Camera, PIR Sensor, and Door/Window Contact

This system features a high-definition IP camera for surveillance. It also includes a passive infrared motion detector, magnetic door/window sensor, and SOS emergency wrist button.

Overview

Comprehensive Security Solution

This integrated surveillance and alarm system provides a robust security solution for residential or commercial environments. The kit combines high-definition IP video monitoring with active perimeter and intrusion detection, including passive infrared (PIR) sensors and magnetic door/window contacts. Designed for reliable performance, it also features an SOS emergency button to ensure immediate assistance in critical situations.

System Components

Included Components

- High-definition IP Camera
- PIR Motion Detector
- Magnetic Door/Window Contact
- SOS Emergency Wrist Button

Model References

RL-R40, RL-R41, RL-R31A, RL-IP2, RL-IPCA02

Key Features

Security Capabilities

Surveillance • Intrusion Detection • Perimeter Security • Emergency SOS
