

# Suspension Clamp for Uninsulated Neutral Conductors

Suspension clamp designed for uninsulated neutral conductors ranging from 25-120mm<sup>2</sup>. Constructed from reinforced thermo-plastic UV resistant body and latch, ensuring high mechanical strength and resistance to climate changes.

## Product Overview

### Suspension Clamp for Uninsulated Neutral Conductors

This suspension clamp is engineered specifically for uninsulated neutral conductors ranging from 25-120mm<sup>2</sup>. Constructed from a reinforced, UV-resistant thermo-plastic body and latch, it offers exceptional mechanical strength and long-term durability against harsh climate conditions. The design includes specialized slotted arm connectors that securely lock the suspended neutral wire, ensuring reliable insulation between the utility pole and the cable.

## Technical Specifications

### Model Comparison

Model	Applicable Range (mm <sup>2</sup> )
1.1A	25-120
1.1B	25-120

Applicable Conductor Range	120 mm <sup>2</sup>
----------------------------	---------------------

Material Composition	Reinforced Thermo-plastic, UV Resistant
----------------------	---

## Features

### Key Features

- High mechanical strength
- UV resistant body and latch
- Slotted arm connectors for secure locking
- Provides essential insulation between pole and cable
