

Suspension Control Arm

This suspension control arm connects the wheel hub to the vehicle's chassis, allowing for controlled movement and stability. Made from durable materials, it withstands the stresses of driving, ensuring proper wheel alignment and handling.

Product Overview

Suspension Control Arm

This suspension control arm serves as a critical link between the wheel hub and the vehicle chassis, engineered to facilitate controlled movement and stability. Constructed from durable materials, this component is designed to withstand significant driving stresses while maintaining precise wheel alignment. It is an essential part of the vehicle suspension system, ensuring optimal handling and safety.

Technical Details

Part Number	K8728-101
Primary Function	Connects wheel hub to vehicle chassis for suspension stability
Key Benefits	Improved Stability, Wheel Alignment Maintenance, Durable Construction, Enhanced Handling
