

Suspension Stabilizer Bar Link

This stabilizer bar link is a crucial component of a vehicle's suspension system, connecting the stabilizer bar to the suspension. It reduces body roll during cornering, enhancing stability and handling.

Product Overview

Suspension Stabilizer Bar Link

This suspension stabilizer bar link is a critical component designed to connect the anti-roll bar to the vehicle's suspension system. By effectively minimizing body roll during cornering, it significantly improves vehicle stability and handling performance. Constructed with durable materials and high-quality bushings, it is engineered to reduce noise and vibration for a smoother driving experience.

Compatibility

Compatible Models

- Dodge Ram 1500 Pickup 1994-1995
- Dodge Ram 2500 Pickup 1994-1995
- Dodge Ram 3500 Pickup 1994-1995

Technical Details

Included Components

- Rubber Bushings
- Metal Washers
- Threaded Ends

Key Features

Durable Construction, Black Finish, Vibration Damping, Threaded Attachment
