

SV-50 Industrial Screw Air Compressor

This industrial screw air compressor is designed for efficient and reliable compressed air supply. It features a high-performance screw compressor unit, an efficient cooling system, and advanced control electronics.

Product Overview

Industrial Efficiency

The SV-50 Industrial Screw Air Compressor is engineered for high-performance and continuous operation in demanding industrial environments. It provides a stable and consistent air supply essential for heavy-duty applications. Designed with advanced control electronics and an efficient cooling system, this unit ensures maximum uptime and reliability for professional facilities.

Key Features

Capabilities

High-performance, Energy-efficient, Continuous operation, Advanced monitoring

Technical Specifications

Performance Overview

50 SV

Model Series

Equipment Design

- Robust sound-attenuating enclosure
- Integrated ventilation system
- High-performance screw compressor block
- Digital control and monitoring panel

Safety

Operational Safety

Read manual before operation • Industrial grade
