Product Overview

High-Efficiency All-Season Heating

The NeoPeak Pro series offers a powerful solution for pool temperature control with a capacity reaching up to 35kW. Its space-saving vertical exhaust design makes it ideal for compact installations, while advanced Full DC Inverter technology ensures quiet operation and significant energy savings of up to 40%. Engineered for year-round utility, the unit features intelligent auto-defrosting that maintains performance in temperatures as low as -12°C.

Performance Metrics

Key Performance Indicators

35 kW

Max Capacity

40 %

Running Cost Savings

-12 °C

Min Ambient Temperature

Technical Features

Core Technologies

Full DC Inverter, Top Discharge Design, Soft Start, Automatic Defrost

Sustainability

Refrigerant Benefits (R32)

- 68% less Global Warming Potential compared to R410A
- 20% less volume required than R410A
- 75% cost reduction in F-gas quota procurement
