

Swimming Pool Pump with Polymer Housing

This swimming pool pump is engineered for reliable water circulation in swimming pools and spas. It features a corrosion-resistant reinforced polymer construction designed to withstand harsh chemical environments and extend service life.

Product Overview

High-Performance Pool Filtration

The CFRP series swimming pool pump is engineered for reliable and efficient water circulation in both medium and commercial swimming pools. Featuring a corrosion-resistant polymer construction, it is designed to withstand harsh chemical environments for an extended service life. The system includes a large capacity strainer basket to capture debris, ensuring quiet operation and effective water turnover.

Technical Specifications

IP Protection

IP 55

Motor Type

Asynchronous, two poles

Insulation Class

Class F

Materials and Construction

Material Components

Component	Material
Pump Body	Cast Iron
Prefilter	Cast Iron
Impeller	HT200
Shaft	Stainless Steel AISI 304
Mechanical Seal	Graphite/Ceramic

Applications

Primary Applications

Medium Pools, Commercial Pools, Spas

Operational Features

Operation

Continuous operation
