

Swimming Pool Sand Filter

High-performance sand filter designed for swimming pools of various sizes. It provides efficient removal of debris and impurities, and is constructed with UV-resistant materials for long-lasting outdoor use.

Product Overview

Professional Grade Sand Filtration

This high-performance sand filter is engineered with polyester and glass fiber winding to ensure exceptional durability and all-weather reliability. Designed for versatility, it supports private, public, fish pools, and Jacuzzis through an advanced multi-port 6-way valve system. The unit features robust construction including stainless steel hubs, an integrated pressure management system, and easy-access maintenance ports for consistent water clarity.

Technical Specifications

Max Working Pressure

2.5 bar

Maximum Pressure

Filtration Bed Depth

1 meter

Valve Functions

6-Way Valve Modes

- Filter
- Waste
- Close
- Backwash
- Re-circulate
- Rinse

Key Features

Maintenance Features

- Integrated sight glass
- Air bleed system
- Large sand/water drain
- Umbrella-fold self-cleaning laterals

Construction Materials

Polyester, Glass fiber, Stainless steel
