

Swimming Pool Water Heat Pump

This heat pump is designed for swimming pool heating, providing an energy-efficient and reliable solution. It uses heat exchange technology to extract heat from the air and transfer it to the pool water, ensuring consistent and comfortable swimming conditions.

Product Overview

High-Efficiency Pool Heating

This high-performance heat pump provides a reliable, energy-efficient solution for maintaining optimal pool water temperatures year-round. By utilizing advanced heat exchange technology to extract thermal energy from ambient air, it offers a cost-effective and eco-friendly alternative to traditional heating systems. The unit is engineered for durability with a weather-resistant casing and operates with minimal noise, ensuring a quiet environment.

Technical Specifications

Working Components

- Evaporator
- Compressor
- Condenser
- Expansion Valve
- Refrigerant Circuit
- Intelligent Control Unit

System Metrics

1 Ambient Air

Heat Source

1 Heat Exchange

Operation Type

Features

Key Attributes

Weather-resistant, Low-noise operation, Compact design, Eco-friendly, Intelligent control
