

Swimming Pool Water Pump

This swimming pool pump is designed for efficient water circulation and filtration. It is constructed with durable materials for longevity and resistance to corrosion.

Product Overview

High-Performance Pool Filtration

This premium swimming pool water pump is specifically engineered for efficient water recycling and filtration in medium to large commercial pool environments. Built with high-grade 316 stainless steel components, it ensures exceptional corrosion resistance and longevity. The unit features a hydraulic-optimized design with an integrated slag basket to minimize maintenance needs and a dedicated drainage system for complete water evacuation.

Technical Specifications

Motor Specifications

1450 rpm

Rotation Speed

4 P

Motor Poles

Maintenance & Design

- Large capacity hair collector
- Hydraulic-optimized internal design
- Integrated 316 stainless steel slag basket
- Dual drain ports for complete pump evacuation

Material Construction

316 Stainless Steel Pump Body, 316 Stainless Steel Shaft, 316 Stainless Steel Slag Basket

Applications

Suitable Applications

Commercial Swimming Pools • Medium-sized Pools • Water Circulation Systems • Filtration Systems
