

Swivel Base Bench Vise

This bench vise is designed for secure workpiece clamping in a variety of applications. It features a swivel base that allows for 360-degree rotation and flexible positioning.

Product Overview

GS Series Versatility

The GS Series Vise is a robust and versatile tool engineered for secure workpiece clamping across diverse industrial and workshop applications. Constructed from high-strength materials, it offers exceptional durability and resistance to wear for long-lasting reliability. Featuring precision-machined jaws and a 360-degree swivel base, this vise provides enhanced flexibility, reliable grip, and even pressure distribution for consistent performance.

Key Features

| | |
|--------------------|---|
| Base Rotation | 360-degree swivel |
| Clamping Mechanism | Integrated locking mechanism |
| Jaw Design | Precision-machined for even pressure distribution |
