

Swivel Castor Wheel with Elastic Rubber Tire

This swivel castor wheel has a blue elastic rubber tire for optimal grip and floor protection. It is mounted on a zinc-plated steel bracket with a top plate for secure installation.

Overview

High-Performance Swivel Castor

This swivel castor wheel features a high-quality elastic rubber tire designed for smooth rolling and superior floor protection. Built with a durable zinc-plated steel bracket, it offers excellent resistance to corrosion and wear. The integrated top plate ensures secure and stable mounting, making it an ideal solution for a wide range of industrial and commercial mobility applications.

Technical Specifications

Wheel Diameter	100 mm
Wheel Width	33 mm
Material Composition	Elastic Rubber, Zinc-Plated Steel

Design Features

Mounting Type	Top Plate
Movement	Swivel
Axle Design	Central Bolt Axle

Performance

Key Benefits

- Floor protection
- Smooth rolling operation
- Corrosion-resistant bracket
- Secure top plate mounting
