

System Hand Controller with LCD Display

This hand controller is designed for comprehensive monitoring and control of electronic systems. Its user-friendly interface includes a graphical LCD display and supports remote operation.

Product Overview

Advanced System Control

This sophisticated hand controller is designed for comprehensive monitoring and control of electronic systems. It features a user-friendly interface with a graphical LCD display, allowing for clear visualization of critical system parameters and operational status. Engineered for versatility, it supports a wide range of communication protocols to ensure seamless integration with various networks and devices.

Key Features

Control Functionalities

- Remote start/stop operation
- Real-time parameter adjustment
- Comprehensive alarm management
- Event logging and monitoring

Interface	Graphical LCD Display
Application Suitability	Industrial, Commercial, System Monitoring

Durability

Build Quality

Robust Design • Reliable Operation
