

T-Segment Diamond Grinding Cup Wheel

This diamond grinding cup wheel is engineered for aggressive material removal and surface preparation on concrete, stone, and masonry. Its T-shaped segments facilitate efficient grinding and improved dust extraction.

Product Overview

T-Segment Diamond Grinding Cup Wheel

This high-performance diamond grinding cup wheel features a T-segment design optimized for aggressive material removal and professional surface preparation. It is specifically engineered to deliver efficient grinding and improved dust extraction when working on concrete, masonry, and stone surfaces. The robust design makes it an ideal solution for leveling, smoothing, and cleaning applications, ensuring reliable performance when paired with standard angle grinders.

Technical Specifications

Available Models

Item No.	Diameter	Segments	Segment Size	Arbor
CWB04007	105mm	8	32.2x19x5mm	22.23mm
CWB4.5007	115mm	9	33x19x5mm	22.23mm
CWB05007	125mm	10	33x19x5mm	22.23mm
CWB06007	152mm	12	32.5x19x5mm	22.23mm
CWB07007	180mm	14	32.5x19x5mm	22.23mm

Application

Primary Applications

- Surface leveling
- Concrete smoothing
- Surface cleaning
- Material removal

Suitable Materials

Concrete, Stone, Masonry
