

T8 Fluorescent Tube 1.2m 36W

The T8 fluorescent tube measures 1.2 meters in length and consumes 36W of power. It is designed for general lighting, offering efficient and reliable illumination for various applications.

Product Overview

Professional T8 Lighting Solution

This T8 fluorescent tube provides a reliable and efficient lighting solution suitable for commercial, industrial, and residential environments. Featuring a standard G13 base and 1.2-meter length, it is designed for easy installation in existing fixtures. The tube delivers high light efficiency and a consistent 2200LM output, ensuring comfortable and pleasant illumination.

Technical Specifications

Luminous Flux

2200 LM
Light Output

Power Rating	36 W
Voltage Options	110V, 220V
Color Temperature Range	2700K - 8000K

Physical Attributes

Length	1.2 m
Base Type	G13
Material	Glass

Performance & Lifecycle

Key Characteristics

- High light efficiency
- Long lifetime
- Soft light output
- Improved psychological effect
- Decorative appeal

Rated Lifetime	10000 H
