

T8 LED Tube Light

This LED tube light has a long operational life, lasting up to 30,000 hours. It provides high brightness and efficient illumination while saving over 50% more energy than standard lamps.

Product Overview

Professional LED Illumination

This T8 LED tube light is designed for commercial and industrial engineering applications, offering superior longevity and energy efficiency compared to traditional lighting. It provides high brightness and consistent illumination while reducing power consumption by over 50%. Engineered for durability and environmental compatibility, it is an ideal choice for professional spaces requiring reliable, long-term lighting performance.

Technical Specifications

Lifespan

30000 hours

Operational Life

Key Features

- High color rendering index
- No electromagnetic interference
- Recyclable materials
- Easy to install and operate

Energy Efficiency

50 %

Applications

Suitable Environments

Large Offices, Meeting Rooms, Department Stores, Showrooms, Hospitals, Schools

Design

Construction

Glass Tube • Golden Head
