Product Overview

High-Efficiency LED Lighting Solution

This T8 LED tube serves as a direct, energy-efficient replacement for traditional 60W fluorescent tubes. Engineered for durability and performance, it eliminates the need for ballasts and starters while providing instant, flicker-free illumination. Designed for both commercial and residential environments, this solution helps reduce maintenance costs and electricity consumption.

Technical Specifications

Power Factor	0.9
Model Number	JL-T8009W05A

Key Advantages

Energy Performance

70 %

Electricity Bill Savings

Core Benefits

- No ballast or starter required
- Shockproof and vibration proof solid-state design
- Extended operational lifespan
- Easy installation for standard 4ft fixtures

Compliance and Environment

Sustainability	Eco-Friendly, No Lead, No Mercury, UV-Free, IR-Free
