Product Overview

Energy-Efficient LED Lighting Solution

The T8 LED series is designed as a direct, energy-efficient replacement for traditional fluorescent tubes, offering superior performance for commercial, industrial, and residential applications. These tubes feature a high-quality white diffuser for uniform, flicker-free light distribution and are built for durability with EU-standard electrical components. Environmentally friendly and mercury-free, these lamps provide a reliable lighting solution with high color rendering capabilities.

Technical Specifications

Input Voltage Range	176-264V
Power Factor (PF)	0.9
Color Rendering Index (RA)	80
CCT Options	2700K - 6500K

Product Variants

Model Specifications

Model	Dimensions	Power (W)	Lumen Output
T8-9W	28*598mm	9	900±10%
T8-18W	28*1198mm	18	1800±10%
T8-24W	28*1498mm	24	2400±10%

Compliance and Features

Compliance	EU Standard, Mercury-Free
