

Tabletop Vacuum Packaging Machine

This tabletop vacuum packaging machine provides efficient and reliable vacuum sealing for various products. It is ideal for small to medium-scale operations, ensuring extended shelf life and product freshness.

Product Overview

Professional Tabletop Vacuum Packaging Solutions

These tabletop vacuum packaging machines are designed to provide efficient and reliable sealing performance for small to medium-scale operations. By removing air and creating a vacuum seal, these units help extend product shelf life and ensure freshness for food items, electronic components, and other sensitive materials. Built for durability and ease of use, they are an essential tool for maintaining product integrity and protection against oxidation and moisture.

Performance Metrics

Technical Comparison Table

Model	Chamber Size (mm)	Exhaust Volume	Weight (kg)
DTZF-260	380x280x90	10m ³ /h	35
DTZF-350	450x370x220	10m ³ /h	44
DTZF-450	460x450x220	20m ³ /h	68

General Specifications

Supply Voltage	220V
Degree of Vacuum	-0.1MPa
Sealing Form	Single closed
Suitable Applications	Food Packaging, Electronic Components, Sensitive Materials, Moisture Protection
