

Tabletop Vacuum Packaging Machine

This compact table-top vacuum packaging machine is designed for efficient sealing of products. It is suitable for packaging food items, electronic components, and other sensitive materials requiring protection from air and moisture.

Product Overview

Professional Vacuum Packaging Solution

This table-top vacuum packaging machine is designed to offer high-performance sealing for a wide range of goods, including solids, powders, pastes, and liquids. Built with 304 stainless steel and a unique tilt-table design, it ensures hygiene and prevents moisture loss during the packaging process. The advanced micro-computer control system provides waterproof, moisture-proof operation, making it ideal for food products, medicines, electronic components, and military supplies.

Technical Specifications

Model	DTZF260
Construction Material	304 Stainless Steel
Controller Type	Micro-computer Control

Features & Compatibility

Suitable Industries

- Food & Beverage
- Pharmaceuticals
- Electronics
- Chemical Materials
- Military & Police Supplies

Supported Product Forms

Solid • Powder • Paste • Liquid

Compatible Packaging Materials

Plastic composite film, Aluminum foil composite film

Operational Benefits

Performance Highlights

1 Low failure rate

Maintenance

1 Washable

Hygiene
